Mr. R. Peake
Lake Walton Park
Lake Walton Road
Town of East Fishkill, NY

RE: JMC Project 3006

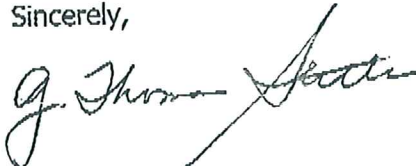

Dear Mr. Peake,

Regarding the acceptability of the school bus access design for Lake Walton Park project, please be advised that we have reviewed your plan and find the plan acceptable to the district on the following conditions:

First, that the road traveled by our buses (to enter and exit the development) be a public road.

The second concern deals with the use as a single pickup for all students in the development, as it is described on your plan. This is acceptable so long as the streets in the development remain private. Should the roads ever be turned over to the Town of East Fishkill, the district will have to review the plan and assign appropriate bus stops that conform to the district's bus stop safety and distance policy.

Sincerely,

G. Thomas Stella
